Re: Peterborough PEO Chapter Student Employment Program

In recent years the Peterborough Chapter of Professional Engineers Ontario (PEO) has invested in significant efforts to promote engineering to local students through the annual Engineering Challenge, as well as the awarding of scholarships to graduating high school students entering engineering programs.

The Peterborough Chapter is pleased to announce that it has established a pilot program to help connect these engineering students with local employers (with engineering related positions).

There is no obligation by the Employer participating in this pilot program to employ students. Enrollment as an Employer in this pilot program simply means that you will receive information on local Engineering Students as it becomes available.

To participate in the program as a potential Employer, please complete and fill out the Employer or Student form which you may access via the link below.

[Enroll as an Employer](#)

[Enroll as a Student](#)

Students enrolled in the pilot program will be provided with the information provided potential Employers have provided in the Employer form, excluding any contact information.

For Employers, Questions denoted as "Confidential" are for PEO Chapter purposes only; while Responses for questions denoted as "Public" will be compiled into a stats sheet about the potential employers and shared with students enrolled in the pilot program.

For Students all information provided shall be shared with potential employers.

The PEO Chapter will share any resumés received as a part of this program to enrolled potential Employers.

Disclaimer: Organizing members of this program are employed in local engineering related companies. They must ensure that they act ethically with respect to information they receive as a part of this program. They must share ALL student resumés received through this program, and may not use the resumés for their own employers use unless the following two (2) criteria are met. (1) Their employer must be registered for this program; and (2) the resumé in question must have been sent to all employer parties registered in this program. However, these organizing members are not required to share any resumés they receive through official work-related channels and outside this pilot program.

Best regards,
PEO Peterborough Chapter
